→ Created a Terraform configuration file (main.tf) to define AWS EC2 instance

```
provider "aws" {
  region = "us-east-1"
  access_key = "[redacted]"
  secret_key = "[redacted]"
}

resource "aws_instance" "test" {
  ami           = "ami-0f58b397bc5c1f2e8"
  instance_type = "t2.micro"
}
```

→ After initialized , Checked Terraform execution plan using ‘terraform plan’

```
hp@DESKTOP-KI2M9EV MINGW64 /c/Users/hp/terraform-ec2
$ terraform plan

      + cpu_options (known after apply)

      + ebs_block_device (known after apply)

      + enclave_options (known after apply)

      + ephemeral_block_device (known after apply)

      + instance_market_options (known after apply)

      + maintenance_options (known after apply)

      + metadata_options (known after apply)

      + network_interface (known after apply)

      + primary_network_interface (known after apply)

      + private_dns_name_options (known after apply)

      + root_block_device (known after apply)

      + secondary_network_interface (known after apply)
    }

Plan: 1 to add, 0 to change, 0 to destroy.

Note: You didn't use the -out option to save this plan, so Terraform can't guarantee to take
exactly these actions if you run "terraform apply" now.

hp@DESKTOP-KI2M9EV MINGW64 /c/Users/hp/terraform-ec2
$
```

→ Created EC2 instance using ‘terraform apply’

```
hp@DESKTOP-KI2M9EV MINGW64 /c/Users/hp/terraform-ec2
$ terraform apply

      + maintenance_options (known after apply)

      + metadata_options (known after apply)

      + network_interface (known after apply)

      + primary_network_interface (known after apply)

      + private_dns_name_options (known after apply)

      + root_block_device (known after apply)

      + secondary_network_interface (known after apply)
    }

Plan: 1 to add, 0 to change, 0 to destroy.

Do you want to perform these actions?
  Terraform will perform the actions described above.
  Only 'yes' will be accepted to approve.

  Enter a value: yes

aws_instance.test: Creating...
aws_instance.test: Still creating... [00m10s elapsed]
aws_instance.test: Still creating... [00m20s elapsed]
aws_instance.test: Still creating... [00m30s elapsed]
aws_instance.test: Still creating... [00m40s elapsed]
aws_instance.test: Creation complete after 40s [id=i-012bf4660b2d36ed3]

Apply complete! Resources: 1 added, 0 changed, 0 destroyed.
